

I request that you do NOT weaken the Wisconsin No Call law. If people want to be contacted by telemarketers they have the option of not signing up. For the rest of us, (more than 80%), we do not wish to be bothered by telemarketing calls. Telemarketers have been known to state that they would just as soon have a list of people that do not wish to be called in order save time and make productive calls. If anything, the Federal law should be strengthened to duplicate the WI law in order to give the telemarketers uniformity in conducting their business.
